

Results from a Study of Psilocybin to Treat Obsessive-Compulsive Disorder in Human

Christopher Wiegand, M.D., is a psychiatrist currently in private practice in Tucson, Arizona. His clinical practice includes outpatient psychopharmacology and psychotherapy, hospital and nursing home consultation, and electroconvulsive therapy. In addition, Dr. Wiegand is a Clinical Assistant Professor in the Department of Psychiatry at the University of Arizona; he participates in research, resident supervision, and medical student education. He received his B.A. in Archaeology at the University of Virginia in 1995, his M.D. at the University of Virginia in 1999, and completed Psychiatry residency training at the University of Arizona in June, 2003. Dr. Wiegand will be discussing the safety, tolerability, and efficacy of psilocybin in patients with Obsessive-Compulsive Disorder (OCD). Date of original release: April 18, 2010 Termination date (date after which enduring material is no longer certified for credit): April 17, 2012
